

BALLISTIC VESTS

CZ **4M SPIRIT COMFORT** BALLISTIC VEST

Ballistic T-shirt for covert wear with inner functional layer. Suitable for physically demanding service, long time use and hot climatic conditions.

- T-shirt is designed with the emphasis on maximum concealment
- stable microclimate between the user's body and T-shirt
- tested under variable temperature conditions
- flexible side sections allow easy and quick dressing and undressing
- the ballistic insert is contained in outer pockets
- the reverse side of the knitted fabric is made of polypropylene yarn, pleasant to wear on the bare body
- air circulation is ensured by channels inside the knitted fabric
- the outer side is resistant to mechanical damage such as velcro zippers, etc.

BALLISTIC VESTS

The CZ 4M SPIRIT Comfort ballistic T-shirt belongs to a series of ballistic protective equipment with the most advanced ergonomic design for concealed wearing. The design of the T-shirt is subject to maximum concealment required by undercover operations or personal protection. The COMFORT version is specially designed to be used for the longest possible time, even in very temperate climates, or during heavy physical exertion.

Ballistic inserts are placed in the outer pockets on the inner T-shirt made of MOIRA Diagon material. The reverse side of this knitted fabric is made of polypropylene yarn, which is diagonally laid in the overall knitwear architecture and forms a finely knurled structure. On contact with the body, due to the elasticity of the knitted fabric, the ribs move away from each other and the resulting channels promote air circulation, with capillary action. The front side is made of special polyamide microfibre, which combines with the elastomer to create a compact elastic surface, resistant to mechanical influences.

This unique material can utilize a very small space between the user's body and the ballistic liner and store moisture in the space to ensure a pleasant microclimate for 12 hours or more. When using an additional MOIRA Ultralight T-shirt, it is very comfortable to wear in any conditions. The COMFORT T-shirt is worn over the head and fastened to the body with a back elastic belt. This ensures its position on the body and maximum concealment with any outer layer of clothing (polo, shirt, business suit, etc.) The ballistic insert is attached in the inner pockets and its vertical stability is ensured by a patented solution where the front and back liners are "suspended" on the auxiliary shoulder straps of thin knitted fabric. At the same time, the ballistic material in its protective cover is also secured against sliding.

1. Ballistic insert suspension system
2. MOIRA performance material on body
3. Outer pockets for the ballistic insert
